

Power Assisted Bicycles

'Don't let them push you around!'

When life is enjoyable but mobility is difficult, a simple piece of equipment is the solution to restoring active life.

Bzooma has exclusive rights to distribute two of the most modern wheelchairs available. Both are the latest development in this field.

The big and comfy Roller, and the light and agile Sprint, are both the latest development in this field. They are built to exacting standards that benefit from a generation of systematic research and development.

Sales

To make the purchase of your choice, simply buy from the website www.bzooma.com.au or call your local dealer. Ongoing service will be available from your dealer. For a glimpse of possible new additions to the range of electric personal vehicles, go to www.bzooma.com.au

Clean and Green

Bzooma is dedicated to providing efficient low to zero emission products. Our entire operation uses solar energy. The efficiencies achieved in our business are passed on to you the customer.

Dealer's Stamp or Business Card

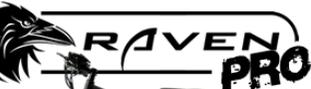

Bzooma Pty Ltd is a wholly Australian-owned company, marketing a great range of quality electric personal vehicles.

We select the most modern, innovative and top quality products, and bring them to you through a national network of dealers.

- ◆ Electric Wheelchairs
- ◆ Motorcycles
- ◆ Mobility Scooters
- ◆ Power Assisted Bicycles

Power Assisted Bicycles

BzooMa's power assisted bicycles are technically advanced designs and are made from quality materials and components, giving you the best riding performance possible for a low internet type price.

BzooMa only selects professional quality components such as gears, brakes, motors and batteries for our range of bikes.

*** All BzooMa bikes are Certified as qualifying for the European standard EN15194 which means they are street legal and are recognised by authorities as ordinary bicycles.**

Motorcycles

BzooMa motorcycles are the product of a long period of development, made possible through technical advances in electrical control equipment, brushless electric motors and lithium battery technology.

Our partner factory exports 200,000 units per year (almost \$100M) of these popular electric motorcycles to all countries of Europe, USA and Russia, where they have been successfully operational for many years.

Mobility Scooters

When mobility challenges you, there is a low cost solution that liberates you to go wherever you wish. The power of modern electric motors, combine with computer technology and powerful batteries, loosens the shackles we once bore.

Our range of Mobility Scooters is carefully selected to be the highest quality, best technology, and the most robust equipment in order to ensure your reliability and safety.
